

# Setting up your Wi-Fi and App

# Get started

Locate your existing  
Internet service device.

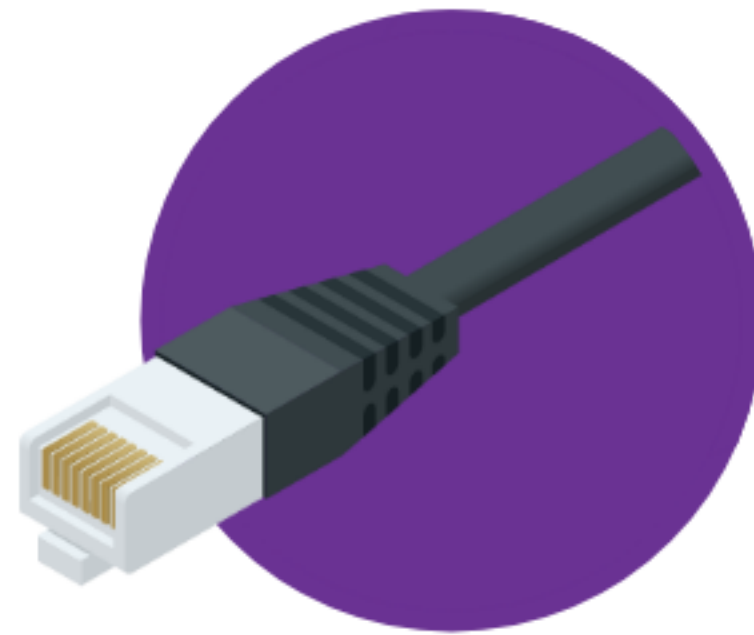

Plug your new system  
into a power outlet.

# Connect

Connect an Ethernet cable from a port labeled WAN on your existing internet service device to the port labeled WAN on your new system.

Once done, your new system will begin to boot-up.

This will take a few minutes.

When completed, the LED light bar on the system will be illuminated solid green, letting you know that the Internet connection has been established.

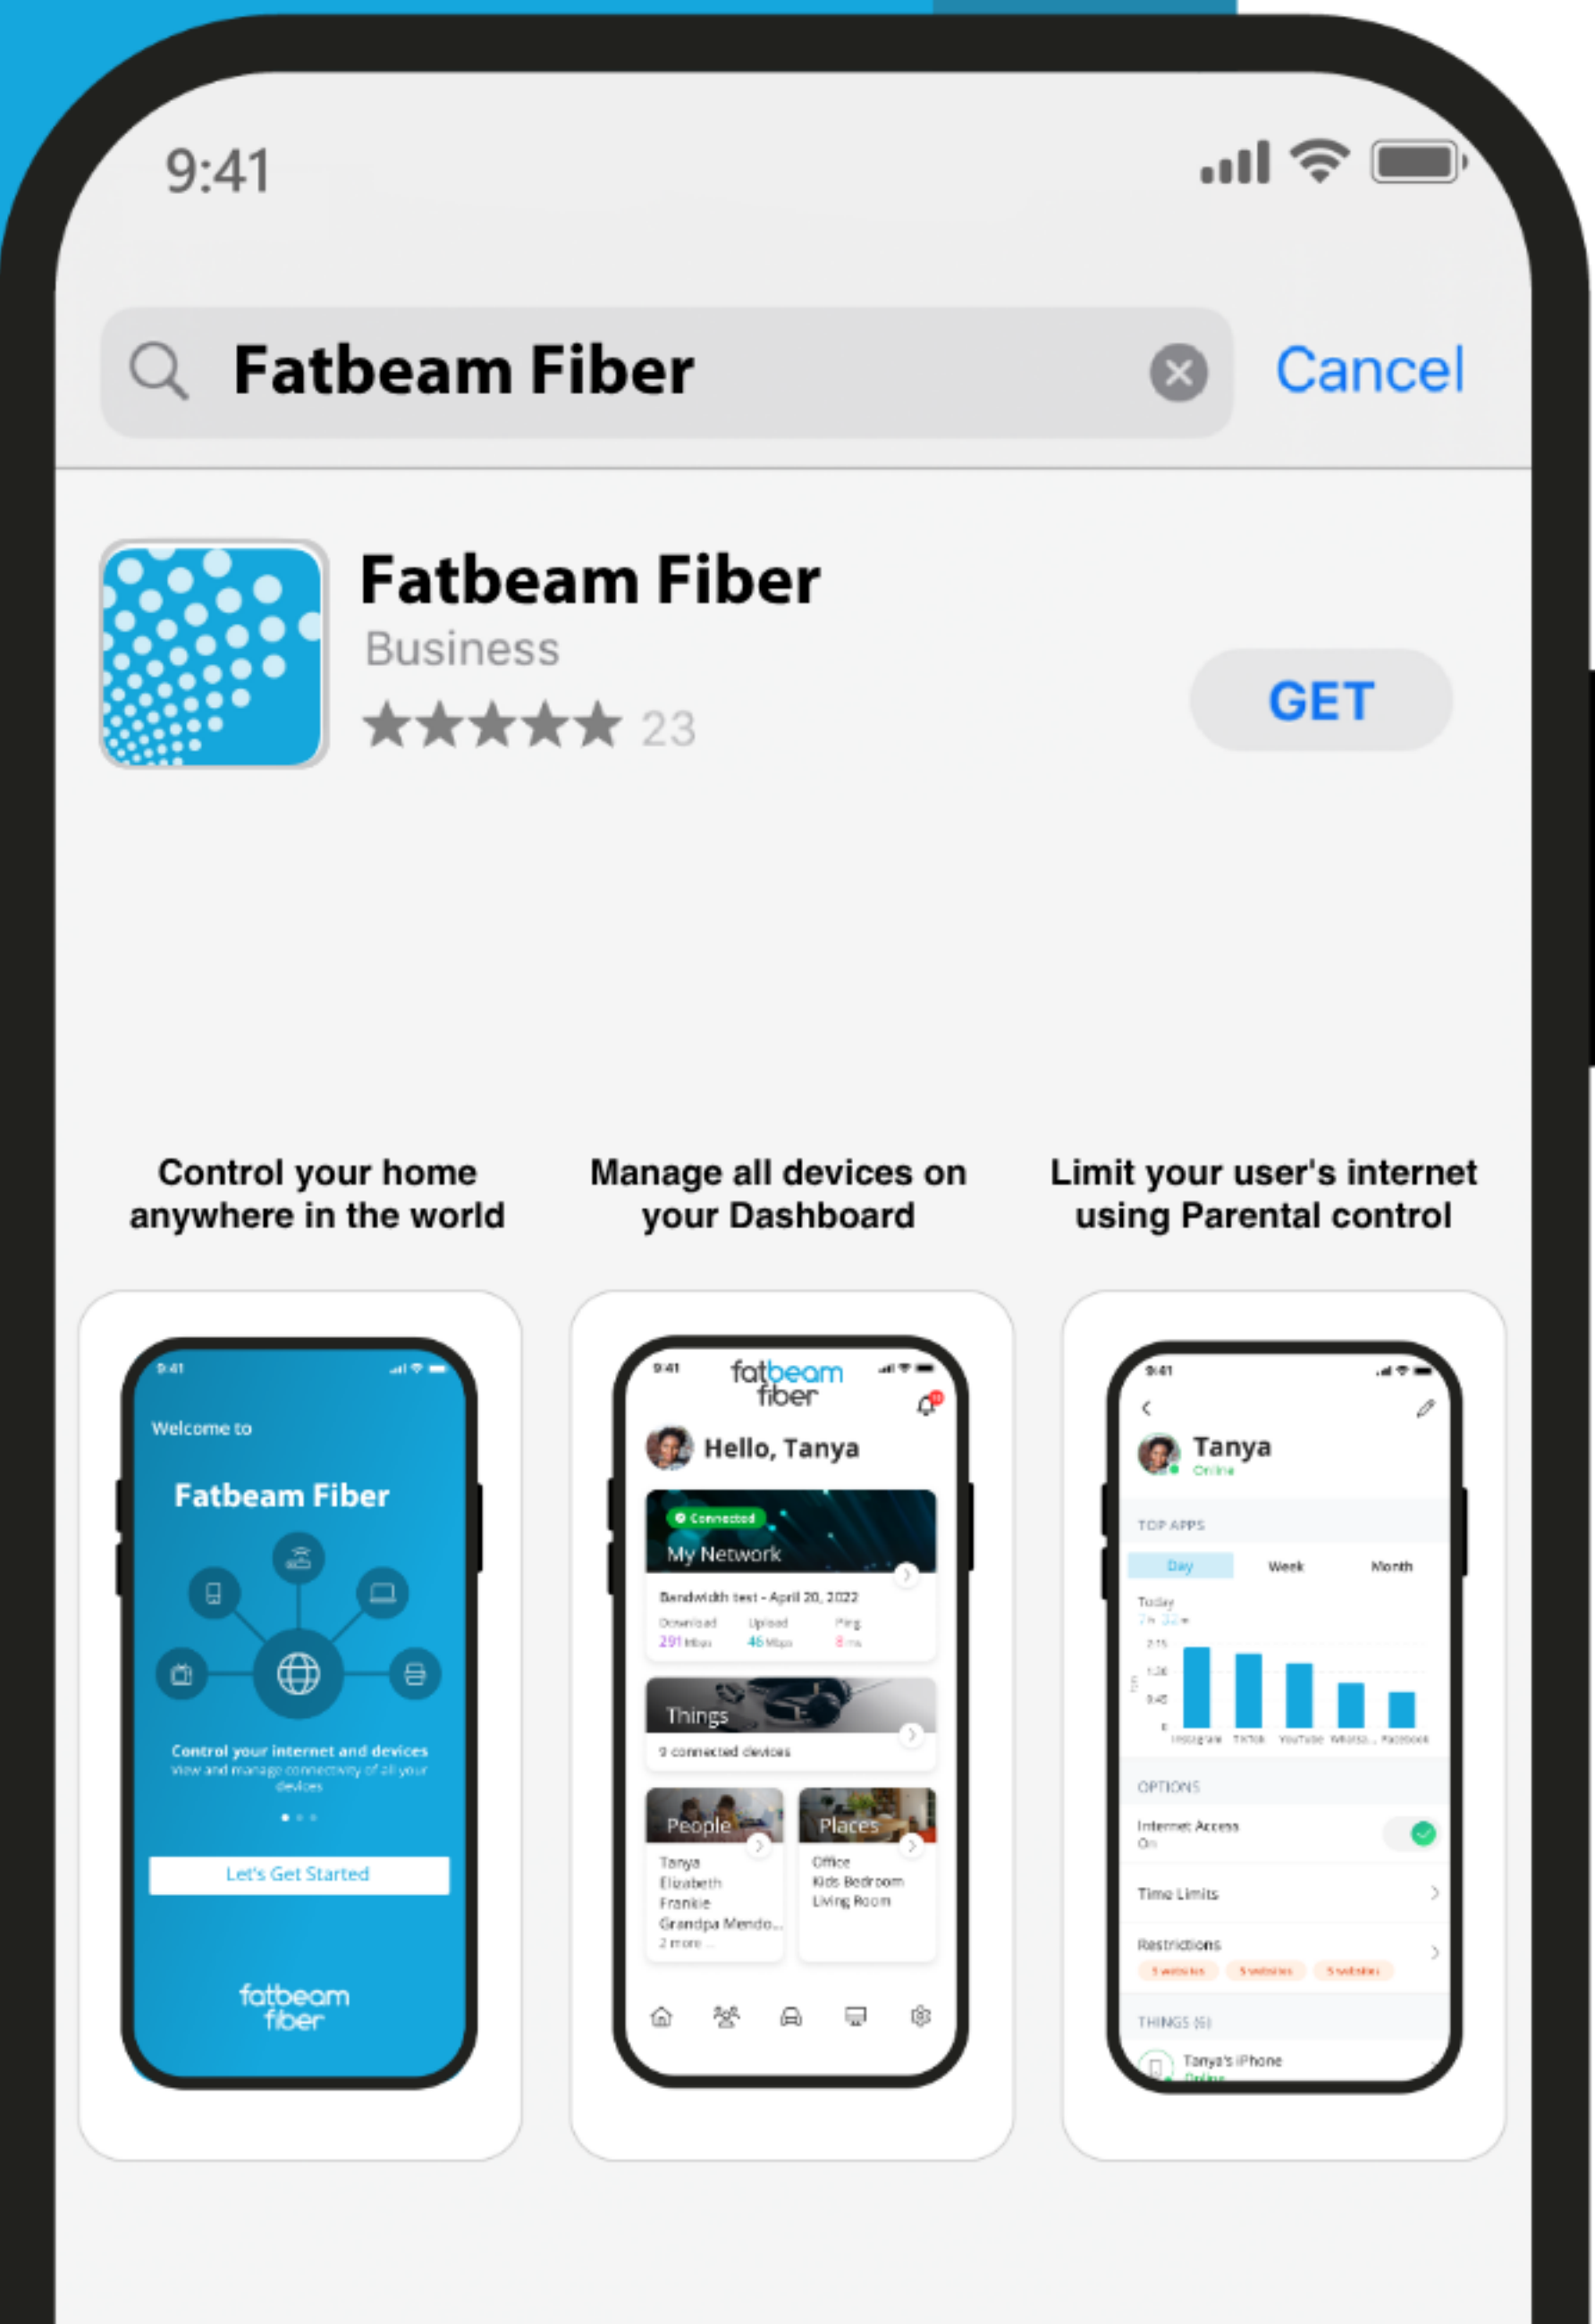

Your new system is set up  
Almost done. Now lets get  
your your Wi-Fi experience  
app set up.

—  
Installing

—  
Fatbeam Fiber

—  
Application

# Install The App

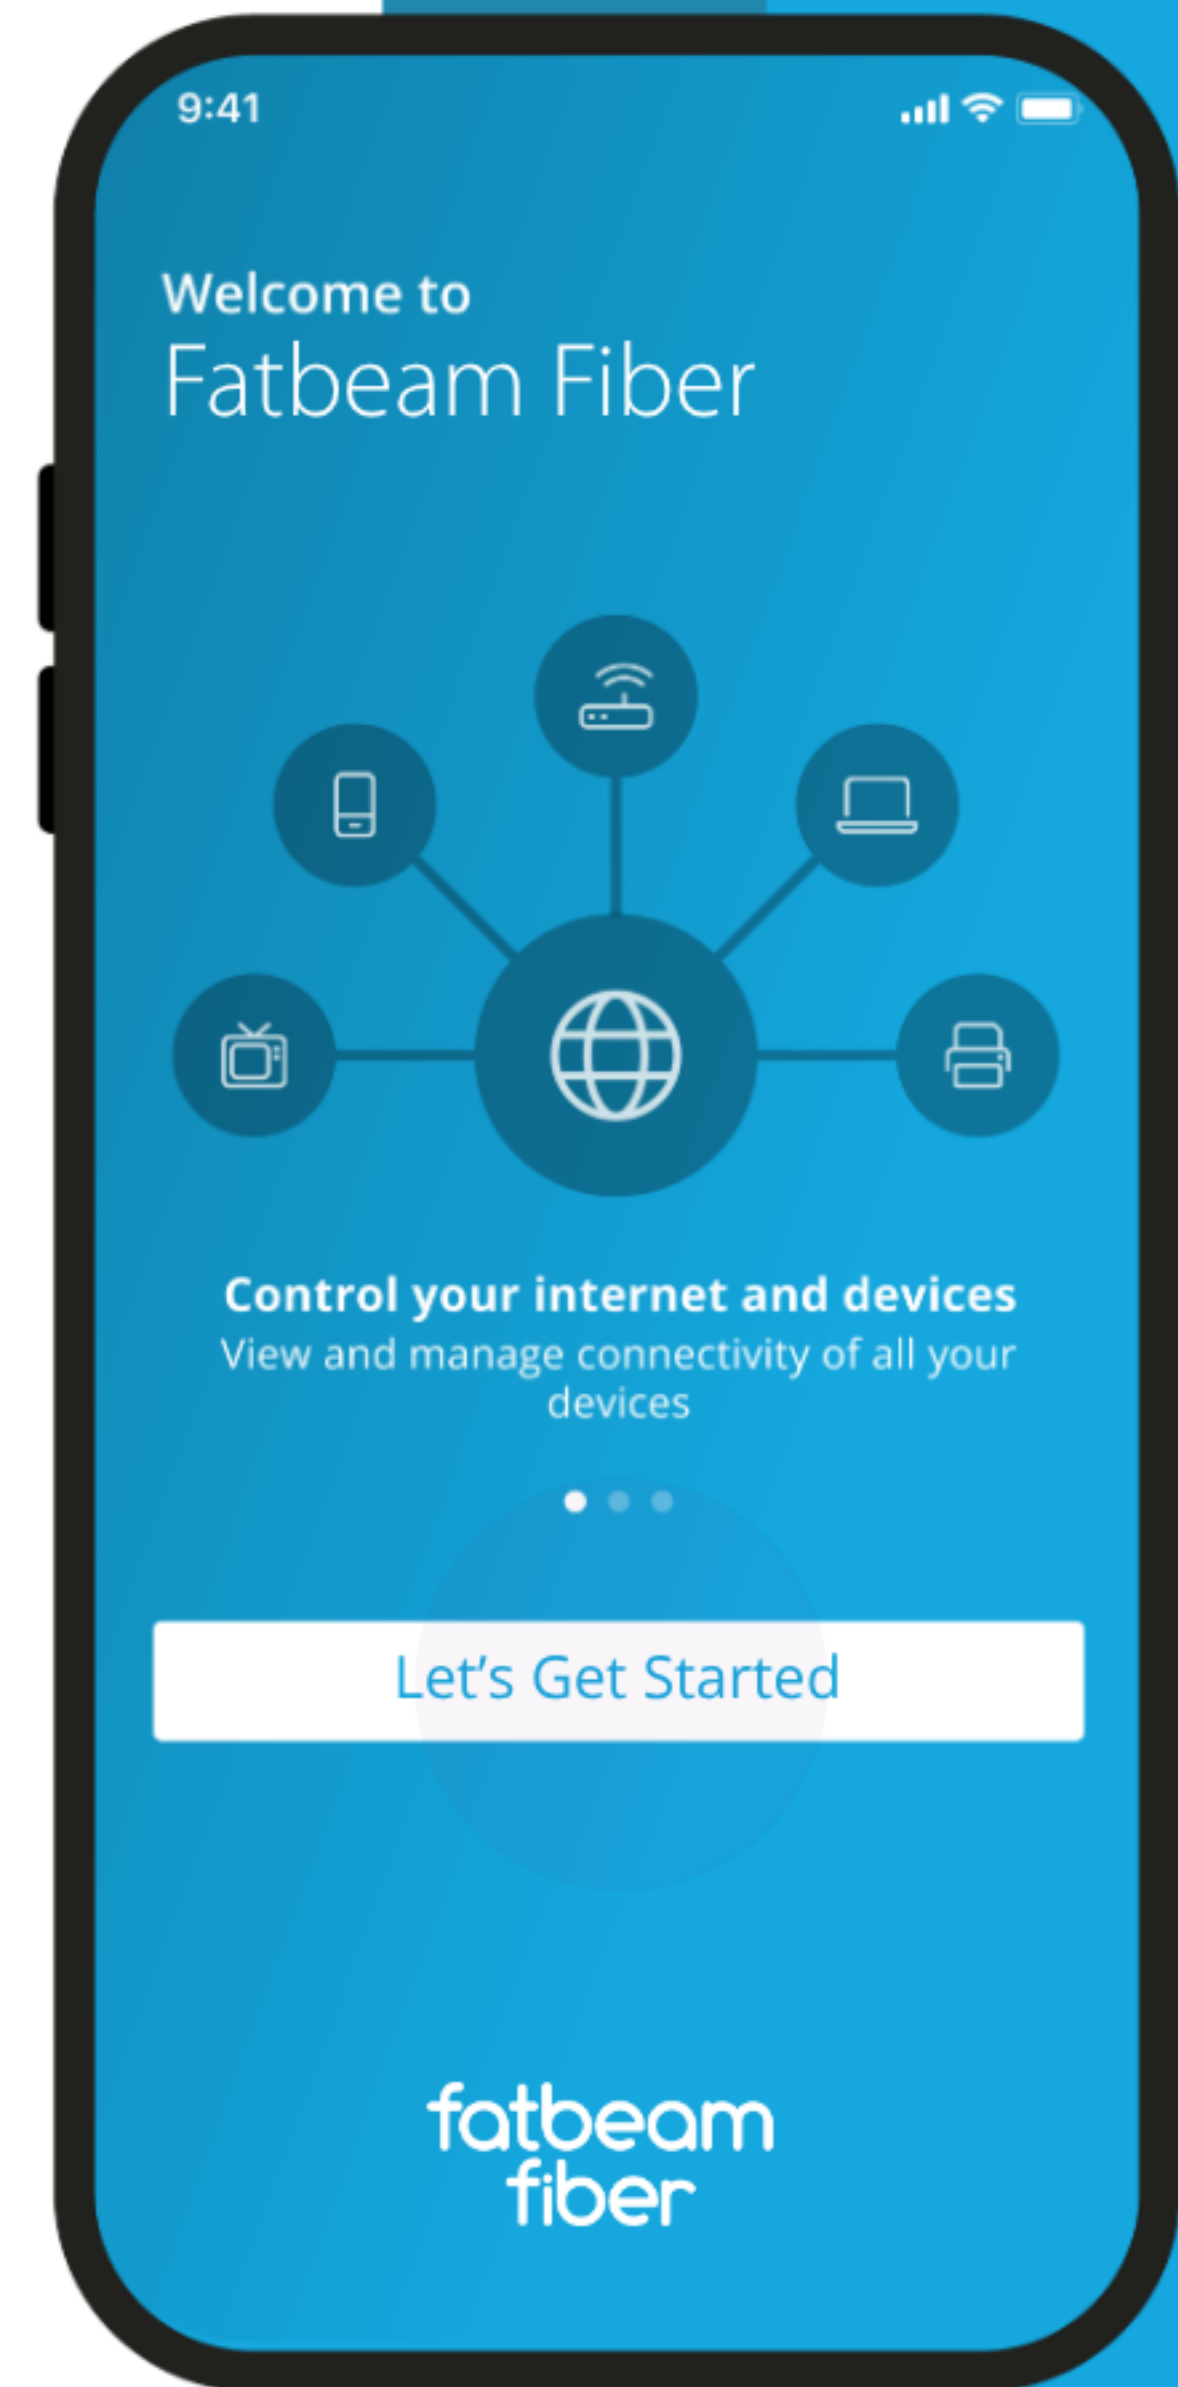

With your System connected, you can get started with the app by simply downloading it from either the Apple App Store or Google Play Store.

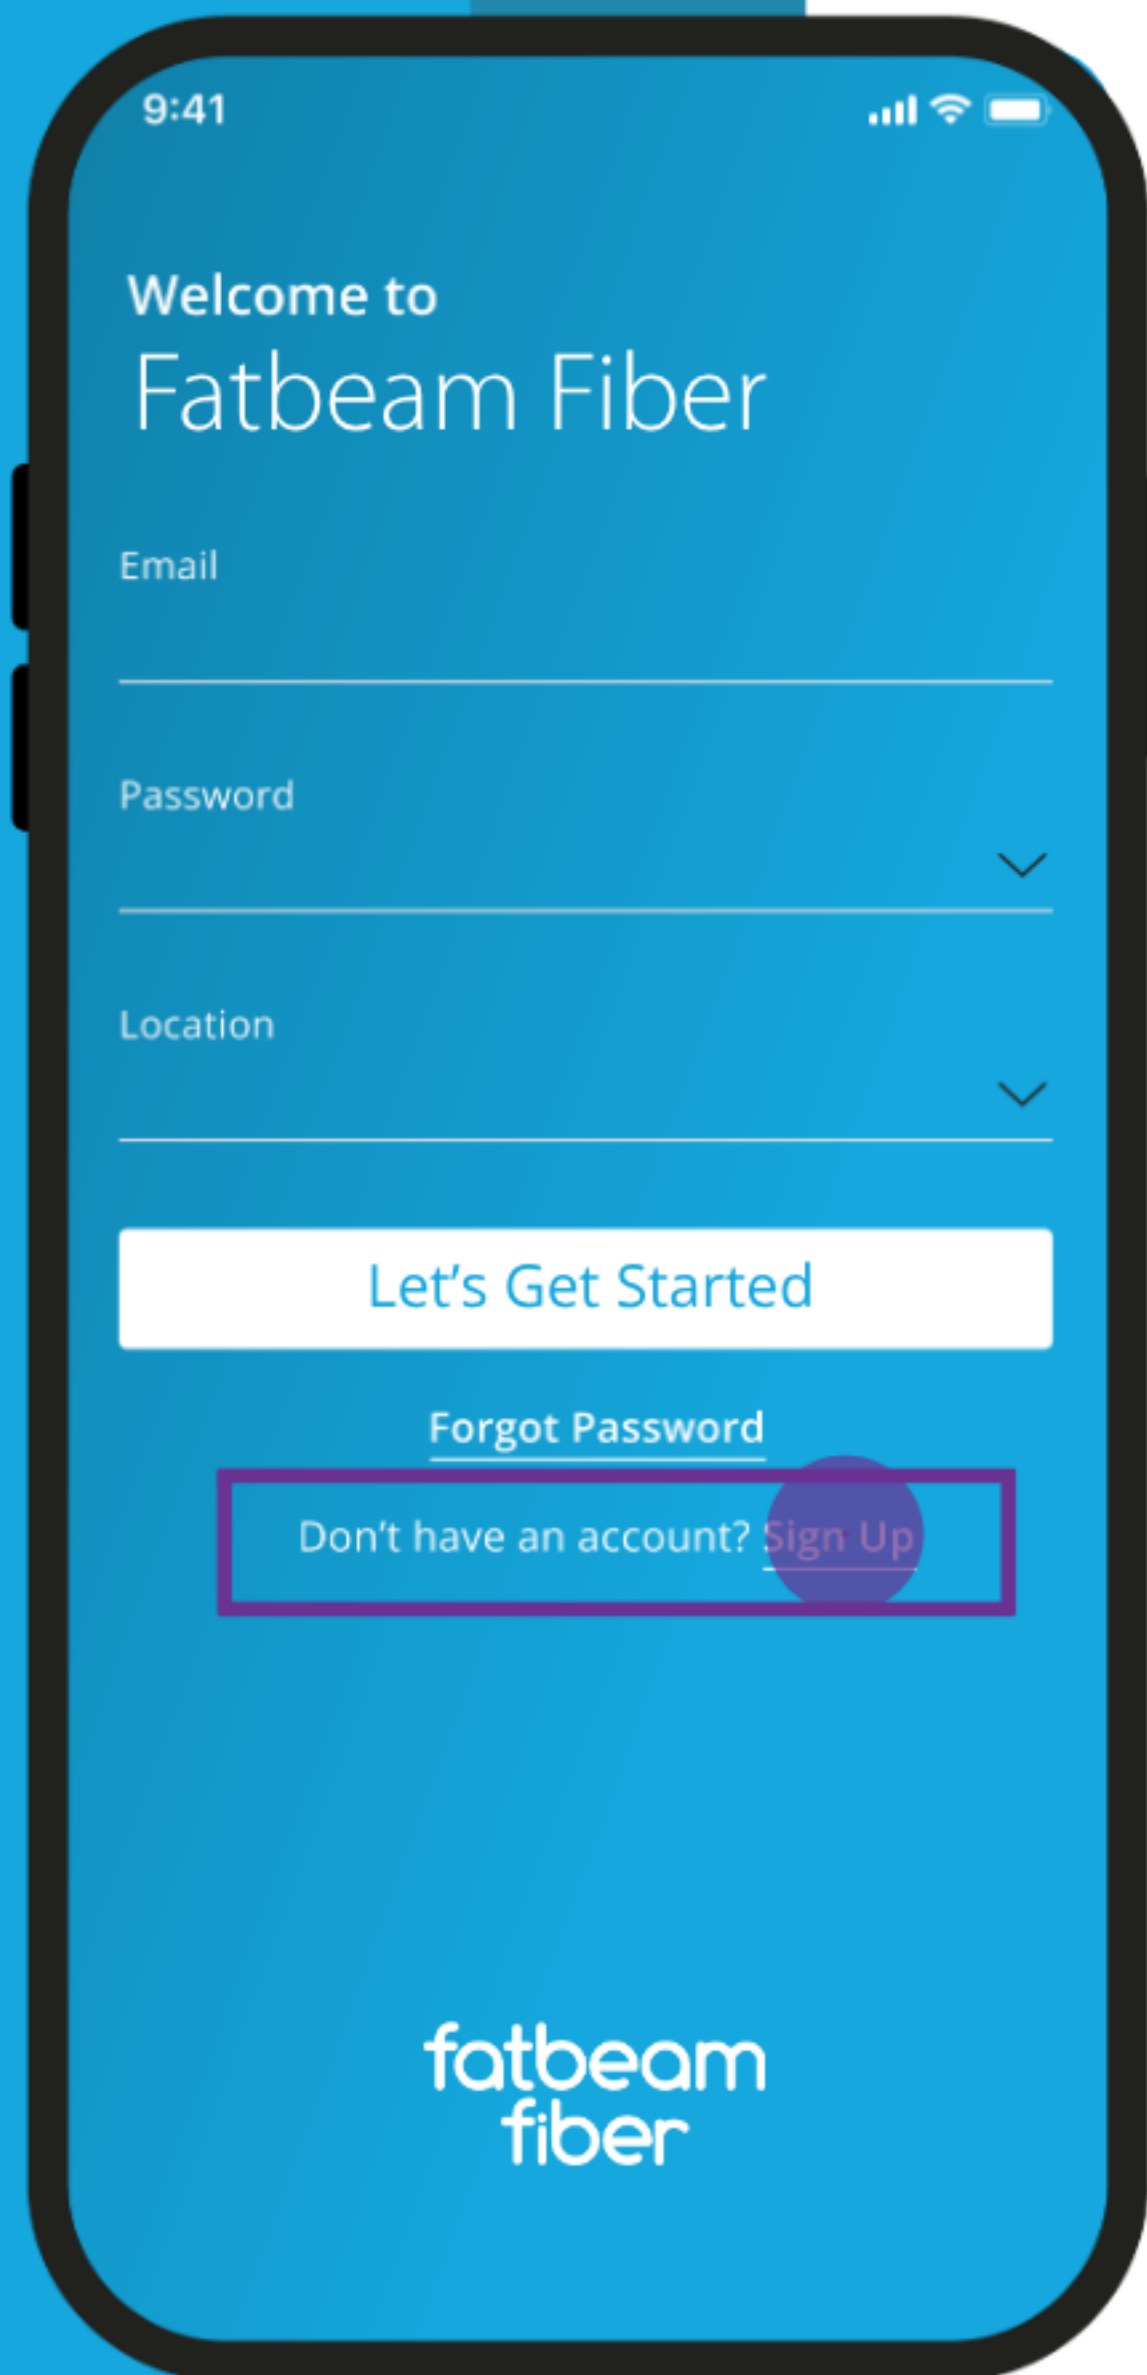

Just search for

**Fatbeam Fiber**

# Sign Up

Once downloaded, open the app on your mobile device and tap “Let’s Get Started” near the bottom of your screen.

## Sign Up

Next you'll need to "Sign Up". Tap the Sign Up link at the bottom to begin.

# Registration

When creating your password, remember, you'll want to choose a strong password that is unique, yet one you can recall easily.
